

1001 Fitting Instructions

Thank you for your recent purchase. please see below a list of the contents. please note sometimes you may have received more than you require.

10 x Wooden Dowels
13x Silver Screw Fixings
13x Screws
13 x Plastic Threads
13 x Plastic White Blanks
Side Wooden Panels x 2 680 x 500 mm
Top x 1 600 x 500 mm
Front Panel x 1 540 x 80 mm
Glass Shelf

1, layout the top on a clean soft surface with the holes visible.
2, Using a soft rubber hammer knock in 11 of the plastic threads in the correct holes.

3, Place the wooden dowels in two the remaining holes and then thread the 11 screws in to the plastic threads.

4, Now locate the front panel and place the silver screw fixings in to the 5 holes making sure the arrows face out towards the smaller hole.

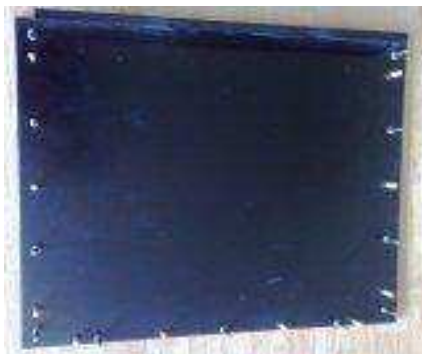

5, Now do the same to both side panels (four on each)

6, Now you have completed this the unit is ready to be put together carefully fit the front and side panels in to position when completed tighten silver fixings to secure.

7 , Turn unit to the correct position and insert the white covers over the silver heads (if required)

8 ,Now slide glass shelf into position (**PLEASE NOTE MAKE SURE SIDE PANELS ARE STRAIGHT OR GLASS WILL FALL OUT.**)

Maybe use a small amount of silicone to secure the shelf in place.

IMPORTANT!

If you are placing a basin on the top of the unit then be very careful not to move the basin around as the ceramic underneath the basin will cause heavy marking to the table surface. When you have your basin in line simply mark the hole for cutting. We recommend you place a soft sheet between the basin and the unit whilst measuring the hole.
